# SEATS

South Essex Advanced Technical Skills

SEATS, working in partnership with Coventry University offer the following Institute of Environmental Management & Assessment (IEMA) certified courses:

## [Introduction to Net Zero](#)

A course which gives a succinct overview of what net zero means as a response to the climate crisis and how it can be delivered within organisations. It is delivered over four parts that make up this course and provide learners with a basic introduction to the concept of net zero.

- **Duration:** 1 day

## [Environmental Sustainability Skills - For the Workforce](#)

This introductory course provides a fundamental awareness of environment and sustainability issues. This is ideal for members of the team who work at an operational level. A practical introduction to environmental sustainability, equipped with the knowledge, understanding and motivation to make a positive difference within the organisation. This course is perfect for those working in any job role across all sectors, to ensure that environmental sustainability is embedded into all job roles of a company. See improvements in performance after just one day.

- **Duration:** 1 day

## [Environmental Sustainability Skills - For the Manager](#)

Supporting managers and supervisors from any industry/business sector in understanding the strategic and operational implications environmental sustainability has on them, their team and department. It enables them to contribute to the improved environmental sustainability of their organisation and is ideal to rapidly upskill their team and those who oversee operational objectives. This transitional course builds on this knowledge and dives into the detail, giving managers and supervisors tools to implement their broadened knowledge and skills. This is ideal for team leaders and managers who want to oversee organisational improvements.

- **Duration:** 2 days

## [Pathways to Net Zero](#)

Clear, consistent guidance on best practice in response to the climate crisis, the course aims to provide supervisors and leaders with a strategic and operational overview of environmental sustainability as it affects their specific industry and work area.

- **Duration:** 2 days

## [Foundation Certificate in Environmental Management](#)

This course explores the bigger picture of environmental issues and how they present challenges to organisations across the globe. The course is highly interactive and drives trainees to practise using skills and tools they will learn, that can apply in the workplace. This course is suitable for individuals that have responsibility for environmental improvements in the workplace.

- **Duration:** 5 days

## [Certificate in Environmental Management](#)

This course builds and expands on the content of the Foundation Certificate in Environmental Management. The course will provide trainees with in-depth sustainability and environmental knowledge and help them be effective environmental/sustainability practitioners. Individuals taking this course will learn about and apply impactful environmental management/assessment tools and skills. The course is designed for anyone working within environmental management and requiring detailed knowledge of environmental/sustainable principles, management tools and skills to effectively deliver positive change.

- **Duration:** 15 days spread over 3 blocks
